

Community Emergency Response Times - Shepparton Regional City

CFA has service delivery standards, which specify a response time target to attend an emergency incident. There are different service delivery standards (response times) across the State, depending on the hazards and risks within a geographic area.

This map shows the percentage of incidents where the community received a response within the applicable service delivery standard (SDS) in a brigade area across all hazard classes for the period of 1 July to 30 September 2022 (Q1). This map shows the timeliness of the service the community received within the brigade area.

Legend

- F** CFA Fire Station (90th percentile seconds over SDS)
- FRV Maintenance area
- Percentage met response time target >= 90%
- Percentage met response time target between 60% and 89%**
- 90th percentile incident response time over SDS time
 - less than 60 seconds
 - 60 to 180 seconds
 - 3 to 6mins
 - more than 6mins
- Percentage met response time target < 60%**
- 90th percentile incident response time over SDS time
 - less than 60 seconds
 - 60 to 180 seconds
 - 3 to 6mins
 - more than 6mins
- Brigade areas with less than 10 Emergency SDS (Code 1) incidents

Footnote:
 Brigade Areas that had less than ten emergency incidents have been excluded.
 This information does not contain CFA's response to Emergency Medical Response as CFA is a support agency and CFA has no response time targets for these incidents.
 Road Crash Rescue has also been excluded as these incidents are subject to different response protocols and service delivery standards.
 This map contains an aggregate of response time compliance across Hazard Class 2, 3 and 4.
 Where the service delivery standard is met by any brigade, this may be from a CFA brigade outside of its own Brigade Area, FRV or SES Unit.
 This map may contain data from other fire services responding into CFA areas
