

REDUCE THE RISKS REFERRAL

INDIVIDUAL

1. I am worried about fire risks in my home

Now that you have done the Prevent Detect Escape e-learning module, try to write your Home Fire Escape Plan and reduce the risks in your home.

2. I have started working on a plan and have made some things safer, but I need help with other things

Ask a family member, friend, carer or support person to assist you. Ask them to do the Prevent Detect Escape module to learn more.

3. I am unable to seek assistance from my family or support network

If there is no one to help you reduce your fire risk, contact the fire services: atriskgroups@frv.vic.gov.au

4. If there was a fire I don't think I could escape without help

If you are unable to get out of your home unassisted and are alone at night, please contact the fire services: atriskgroups@frv.vic.gov.au

SUPPORT WORKER OR SERVICE PROVIDER

1. My client has fire risks and I am very concerned

Now that you have done this training, encourage your client to write their own Home Fire Safety Plan and support them to reduce the risks in their home.

2. My client is unwilling to write a Home Fire Safety Plan, does not recognise their risks or refuses to reduce fire the risks in their home

Refer back to your own organisation.

3. My organisation can not help any further

If you consider the level of fire risk to pose a life safety threat to themselves or others contact fire services for further advice and support by emailing: atriskgroups@frv.vic.gov.au. You can do this without your client's consent.
