

OUTDOOR FIRE SAFETY

Worksheet 30

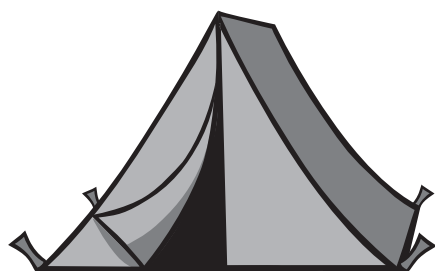

Make a list of outdoor activities that involve fire.

What can be done to help make these activities safer, and to help prevent them from starting a bushfire?

Research and think about ways you could make a campsite more fire safe. In the picture below, add the following:

- Trees and bushes
- Logs of wood
- Rocks or boulders
- A family camping
- Twigs, leaves and branches
- Bucket of water

Remember to draw them in safe places around the campsite!

On the back of this page, list the reasons why you chose to draw each item where you did in the campsite.

How would you change this picture if it was a Total Fire Ban day?
