

# FIRE DANGER RATINGS

**FIRE DANGER RATING**

## Stay aware of the Fire Danger Rating and know what to do.

The Fire Danger Rating predicts how a fire would behave if one started, including how difficult it would be to put out. The higher the rating, the more dangerous the conditions. The rating is your trigger to act, so to stay safe you need to stay aware of the Fire Danger Rating in your district. During the fire season, the Fire Danger Rating will feature in weather forecasts and be broadcast on radio and TV and appear in some newspapers. It can also be found on the websites of the CFA, Department of Environment and Primary Industries and Bureau of Meteorology or by calling the Victorian Bushfire Information Line on **1800 240 667**

### WHAT DOES IT MEAN?

### WHAT SHOULD I DO?

#### CODE RED

These are the worst conditions for a bush or grass fire. Homes are not designed or constructed to withstand fires in these conditions. The safest place to be is away from high-risk bushfire areas.

Leaving high-risk bushfire areas the night before or early in the day is your safest option – do not wait and see. Avoid forested areas, thick bush or long, dry grass. Know your trigger – make a decision about:

- when you will leave
- where you will go
- how you will get there
- when you will return
- what you will do if you cannot leave

#### EXTREME

Expect extremely hot, dry and windy conditions. If a fire starts and takes hold, it will be uncontrollable, unpredictable and fast moving. Spot fires will start, move quickly and come from many directions. Homes that are situated and constructed or modified to withstand a bushfire, that are well prepared and actively defended, may provide safety. You must be physically and mentally prepared to defend in these conditions.

- Consider staying with your property only if you are prepared to the highest level. This means your home needs to be situated and constructed or modified to withstand a bushfire, you are well prepared and you can actively defend your home if a fire starts.
- If you are not prepared to the highest level, leaving high-risk bushfire areas early in the day is your safest option.
- Be aware of local conditions and seek information by listening to ABC Local Radio, commercial radio stations or Sky News TV, go to **cfa.vic.gov.au** or call the Victorian Bushfire Information Line on **1800 240 667**

#### SEVERE

Expect hot, dry and possibly windy conditions. If a fire starts and takes hold, it may be uncontrollable. Well prepared homes that are actively defended can provide safety. You must be physically and mentally prepared to defend in these conditions.

- Well prepared homes that are actively defended can provide safety – check your bushfire survival plan.
- If you are not prepared, leaving bushfire prone areas early in the day is your safest option.
- Be aware of local conditions and seek information by listening to ABC Local Radio, commercial radio stations or Sky News TV, go to **cfa.vic.gov.au** or call the Victorian Bushfire Information Line on **1800 240 667**

#### VERY HIGH

If a fire starts, it can most likely be controlled in these conditions.

- Check your bushfire survival plan
- Monitor conditions
- Action may be needed
- Leave if necessary

#### HIGH

Be aware of how fires can start and minimise the risk.

#### LOW-MODERATE

Controlled burning off may occur in these conditions if it is safe – check to see if permits apply.
