

Preventing Fire Play

i Children are curious about fire. This is normal.

Never let children play with matches or lighters.

If children accidentally start a fire they can get hurt or die.

To keep children safe:

Store matches, cigarette lighters and stove lighters out of reach.

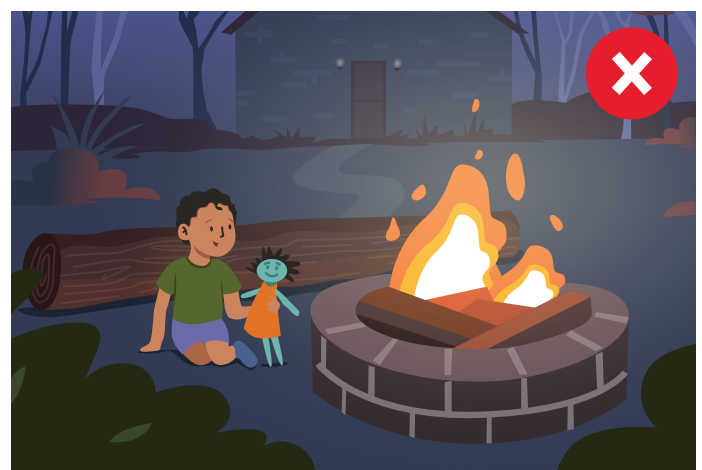

Don't leave matches and lighters where children can take them.

Teach kids that if they find matches or lighters to tell an adult.

Supervise children around heat and flames.

Don't leave children alone with fire or flames.
